Inception date	29 March 2023
Additional expenses	0.06%

The Underlying Fund and Underlying ISIN are as follows: Aegon Global Sustainable Sovereign Bond Fund - IE0005NN5129

### Relative Risk Profile

These risk ratings are only applicable to funds available via TargetPlan. Other risk ratings apply across the rest of our fund range and they, or ratings from other providers, are not comparable. Be aware that even lower risk investments can fall in value.

### Fund objective

This fund will seek to achieve its investment objective by investing at least 67% of its net assets directly or indirectly in government bonds issued across the globe. The remainder will be invested in liquid assets such as cash and cash equivalents. The fund manager aims to add value by investing in financially strong countries that contribute to the improvements in sustainability targets as defined by the United Nations (UN) Sustainable Development Goals (SDGs). Derivatives may also be used for investment and efficient portfolio management purposes.

The fund is actively managed, so returns may not replicate those of the benchmark.

### Fund performance

Under current regulations we are not permitted to show past performance information for funds that do not have four full calendar quarter returns.

Aegon currently invests this fund in a fund managed by Aegon AM.

# Aegon Global Sustainable Government Bond (AMT)

---

To provide a like for like comparison with the benchmark, a special price is calculated monthly at the close of business on the last working day. However, calculating this special price is not always possible and in these cases the standard price is used and this can lead to differences in performance reporting between fund and benchmark. Further differences in performance reporting between fund and benchmark may also arise due to the impact of timing, charges, cashflows, and the pricing basis of the underlying fund. Fund returns are calculated on a total return basis with dividends reinvested.

The value of your plan depends directly on a number of things, including the level of your pensions savings, charges, investment returns and the annuity rates available to buy your pension income when you decide to take your benefits. Levels and basis of, and reliefs from, taxation can also change. Any money that you invest in the plan is tied up until you take your retirement benefits. You cannot normally take the benefits until at least the age of 55.

The value of investments can fluctuate. Fluctuations may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Changes in exchange rates will affect the value of overseas investments. Emerging market investments are often associated with greater investment risk. Two main risks related to fixed income investing are interest rate risk and credit risk. Typically, when interest rates rise, there is a corresponding decline in the market value of bonds. Credit risk refers to the possibility that the issuer of the bond will not be able to repay the principal and make interest payments.

If the name of the Fund includes "BlackRock", "BlackRock" may be abbreviated to "BLK" on some materials such as Annual Benefit Statements.

Regulatory information - This document has been issued by Scottish Equitable plc. The Fund described in this document is available only to trustees and members of pension schemes registered under Part IV of the Finance Act 2004 via an insurance policy which would be issued either by Scottish Equitable plc, or by another insurer of such business. Aegon is a brand name of Scottish Equitable plc. Scottish Equitable plc, registered office: Edinburgh Park, Edinburgh EH12 9SE. Registered in Scotland (No. SC144517).
