Inception date	14 December 2022
Additional expenses	0.03%

The Underlying Fund and Underlying ISIN are as follows: Baillie Gifford Positive Change - GB00BYVGKY80

Relative Risk Profile

These risk ratings are only applicable to funds available via TargetPlan. Other risk ratings apply across the rest of our fund range and they, or ratings from other providers, are not comparable. Be aware that even lower risk investments can fall in value.

Fund objective

This fund aims to outperform its benchmark by at least 2% per year over rolling five-year periods. It does so by investing in the shares of between 25-50 companies across the globe the fund manager believes can deliver positive change in one of four current areas: Social Inclusion and Education, Environment and Resource Needs, Healthcare and Quality of Life; and addressing the needs of the world's poorest populations.

The fund is actively managed, so returns may not replicate those of the benchmark.

Fund performance

Aegon Global Sustainable Equity (AMT)

% returns

Standardised yearly fund performance (%)

	31/12/2018	31/12/2019	31/12/2020	31/12/2021	31/12/2022
Fund	n/a	n/a	n/a	n/a	9.7
Benchmark	n/a	n/a	n/a	n/a	15.3

Past performance is not a reliable guide to future performance. The value of investments and the income from them can fluctuate and are not guaranteed. Investors may not get back the full amount invested. Performance shown is gross of the annual management charge but is net of additional expenses (if any) incurred within the fund. Expenses can include costs paid by Aegon to third parties. The annual management charge will reduce the performance figures shown. Source: Scottish Equitable plc.

Aegon currently invests this fund in a fund managed by Baillie Gifford.

To provide a like for like comparison with the benchmark, a special price is calculated monthly at the close of business on the last working day. However, calculating this special price is not always possible and in these cases the standard price is used and this can lead to differences in performance reporting between fund and benchmark. Further differences in performance reporting between fund and benchmark may also arise due to the impact of timing, charges, cashflows, and the pricing basis of the underlying fund. Fund returns are calculated on a total return basis with dividends reinvested.

The value of your plan depends directly on a number of things, including the level of your pensions savings, charges, investment returns and the annuity rates available to buy your pension income when you decide to take your benefits. Levels and basis of, and reliefs from, taxation can also change. Any money that you invest in the plan is tied up until you take your retirement benefits. You cannot normally take the benefits until at least the age of 55.

The value of investments can fluctuate. Fluctuations may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Changes in exchange rates will affect the value of overseas investments. Emerging market investments are often associated with greater investment risk. Two main risks related to fixed income investing are interest rate risk and credit risk. Typically, when interest rates rise, there is a corresponding decline in the market value of bonds. Credit risk refers to the possibility that the issuer of the bond will not be able to repay the principal and make interest payments.

If the name of the Fund includes "BlackRock", "BlackRock" may be abbreviated to "BLK" on some materials such as Annual Benefit Statements.
